

Staphylococcal protein A (SpA) specific mAb (1266), Fab binding, no Fc interference

Catalog #: **0221-104**
Lot #: **220S1406-005**

Immunogen: Recombinant protein of Staphylococcus aureus protein A with proprietary mutation.

Description: Macaque-derived chimeric monoclonal antibody (human IgG1) against S. aureus protein A (1226), binding through antibody variable region, not Fc

Supplied: 100 µg is supplied in PBS at a concentration of 1 mg/mL.

Purification: Antibody is purified using immobilized protein A/G.

Clonality: Monoclonal of the chimeric human IgG1 isotype.

Storage: 2-3 weeks +4°C, -80°C long term.

Recommended Dilutions: N/A

WB: N/A

ELISA: Assay-dependent dilution. The antibody can be used as primary antibody in a capture ELISA assay against engineered recombinant Staphylococcal protein A (SpA) that diminished Fc binding.

Neutralization: Assay-dependent dilution. The antibody can be used as a neutralizing antibody against S. aureus protein A (SpA) in the cell-based neutralization assay.
